Iridium Satellite Push-to-Talk (PTT) from the Cockpit with Flightcell DZMx all-in-one voice, tracking and data solution.

## Global Push-to-Talk with DZMx

Flightcell DZMx, the world's smallest, lightest, toughest and smartest satellite and cellular communications system - now with Iridium® Satellite Push-to-Talk (PTT).

Flightcell's DZMx's Iridium® PTT functionality provides a global one-to-many capability that is fast and secure. Aircraft with PTT capable DZMx can talk to:

- Other aircraft with Flightcell DZMx PTT
- Personnel on the ground using Iridium® Extreme PTT handsets
- Command posts with Flightcell DZMx PTT ground stations
- Vehicles with Flightcell DZMx PTT

These capabilities are ideally suited to the military, first responder units and search and rescue teams.

Flightcell DZMx switches between PTT and phone modes with the push of a button. Flightcell DZMx supports aircraft tracking in both phone and PTT modes.

Coverage areas, device security and talkgroup configuration are adjusted using a web-based Iridium® PTT Command Center tool that simplifies support and maintenance of devices deployed in the field.
